ABOUT THIS ISSUE

67 About this issue

EDITORIAL: SEA ICE IN THE POLAR REGIONS

68 Meet our guest editors

69 Sea ice in the polar regions

Matthew Chadwick, K.E. Kohfeld, A. Leventer, A. Pieńkowski and H. Zimmermann

SCIENCE HIGHLIGHTS: SEA ICE IN THE POLAR REGIONS

70 Sea ice in the satellite era

Walter N. Meier

72 An Inuit sea-ice-change atlas from Mittimatalik, Nunavut

Katherine Wilson, A. Arreak, Sikumiut Committee and T. Bell

74 Understanding differences in Antarctic sea-ice-extent reconstructions in the Ross, Amundsen, and Bellingshausen seas since 1900

Ryan L. Fogt, Q. Dalaiden and M.S. Zarembka

76 Sea ice: An extraordinary and unique, yet fragile, biome

Letizia Tedesco and Eric Post

78 Sedimentary ancient DNA (sedaDNA) as a new paleo proxy to investigate organismal responses to past environmental changes in Antarctica

Linda Armbrrecht

80 Getting to the core of sea-ice reconstructions: Tracing Arctic sea ice using sedimentary ancient DNA

Sara Harðardóttir, J.R. Evans, D.M. Grant and J.L. Ray

82 Snow petrel stomach-oil deposits as a new biological archive of Antarctic sea ice

Erin L. McClymont, M.J. Bentley, D.A. Hodgson, C.L. Spencer-Jones, T. Wardley et al.

84 Wood, whales, and the water's edge: Three proxies for interpreting past sea-ice conditions on Arctic beaches

F. Chantel Nixon

86 Reconstructing Antarctic sea ice from 130,000 years ago

Matthew Chadwick

88 The importance of glacial-interglacial Antarctic sea-ice reconstructions in understanding atmospheric CO₂ variability

Jacob Jones, K.E. Kohfeld, H. Bostock and X. Crosta

90 Past glacial-interglacial changes in Arctic Ocean sea-ice conditions

Ruediger Stein, A. Kremer and K. Fahl

92 Last Interglacial Arctic sea ice as simulated by the latest generation of climate models

Marie Sicard, A.M. de Boer and L.C. Sime

94 Quaternary Arctic sea-ice cover: Mostly perennial with seasonal openings during interglacials

Anne de Vernal and Claude Hillaire-Marcel

EDITORIAL: EARLY-CAREER PERSPECTIVES ON ICE-CORE SCIENCE

96 Meet our guest editors

97 Early-career perspectives on ice-core science

Jessica Badgeley, T.J. Fudge, B. Koffman and S. Rupper

SPECIAL SECTION: EARLY-CAREER PERSPECTIVES ON ICE-CORE SCIENCE

98 From drilling to data: Retrieval, transportation, analysis, and long-term storage of ice-core samples

Lindsey Davidge, H.L. Brooks and M.L. Mah

100 Putting the time in time machine: Methods to date ice cores

Kaden C. Martin, S. Barnett, T.J. Fudge and M.E. Helmick

102 Our frozen past: Ice-core insights into Earth's climate history

Kathleen A. Wendt, H.J. Bennett, A.J. Carter and J.C. Marks Peterson

104 Ice-core records of atmospheric composition and chemistry

Asmita Banerjee, Ben E. Riddell-Young and Ursula A. Jongebloed

106 Fire trapped in ice: An introduction to biomass burning records from high-alpine and polar ice cores

Sandra O. Brugger, Liam Kirkpatrick and Laurence Y. Yeung

108 Ice-core records of human impacts on the environment

Sophia M. Wensman, J.D. Morgan and K. Keegan

110 The living record: Considerations for future biological studies of ice cores

Madelyne C. Willis, N. Chellman and H.J. Smith

112 Firn: Applications for the interpretation of ice-core records and estimation of ice-sheet mass balance

Drake McCrimmon, A. Ihle, K. Keegan and S. Rupper

114 What can deep ice, water, sediments, and bedrock at the ice-bed interface tell us?

Caleb K. Walcott, E. Erwin and B.H. Hills

116 Ice-core constraints on past sea-level change

Andrew J. Christ, J.R. Andreasen and J. Toller

MOBILITY FELLOWSHIP REPORTS

118 West African paleoclimate reconstruction from estuary mangrove sediments

119 Anthropogenic effects on climate and hydrology of Central Brazil

120 The palynology and paleoenvironment of the coastal environment of Southern Nigeria in the Holocene

OPINION

121 SEDI-SHARE: A new community initiative to promote sediment sample sharing

WORKSHOP REPORTS

122 Studying the past, early-career researchers gather in the virtual world for a better future

123 Learning from the past for a sustainable future

124 Toward a more inclusive and diverse PAGES community

125 Understanding past hydrological changes in Africa since the Last Glacial Maximum

126 SISAL Phase 2: Towards a global compilation of speleothem trace element records

127 Climate Change: The Karst Record IX conference (KR9)

128 Low oxygen in coastal and marine waters

129 Gathering an interdisciplinary community to explore carbon-cycle complexities over the history of the Earth

130 The European Pollen Database in Neotoma: Expanding horizons to new proxy communities

DATA STEWARDSHIP

131 PAGES 2k data portal and the LipDiverse
